DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 10 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The use of a compound is not patentable.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States
- 3. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by BASF EP 416 430.
- 4. The examiner, who does nor speak or understand German, accepts the conclusions of the International Preliminary Examination Report without any reservations.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/538,637

Art Unit: 1714

6. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over BASF EP 0 416 430.

Page 3

- 7. The examiner, who does nor speak or understand German, accepts the conclusions of the International Preliminary Examination Report without any reservations.
- 8. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koning et al. 6,548,591, in view of Martens et al. 5,618,865, Kasowski et al. 6,025,419 or Cosstick et al. 6,166,114.
- 9. Koning et al. disclose high molecular weight polyamide and low molecular weight polyamide in claims 1-11. The addition of fire retardants is shown in column 3, line 51. Martens et al. teach polyamide and melamine phosphate or melamine pyrophosphate in claim 1. Kasowski et al. recite polyamide and melamine polyphosphate in claim 1. Cosstick et al. reveal polyamide and melamine phosphate or melamine polyphosphate or melamine pyrophosphate in claim 1. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to use the flame-retardants of the secondary references in the composition of Koning et al., since they are customarily used in polyamide compositions.
- 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Vasu Jagannathan can be reached on (571) 272-1119. The fax phone
